## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains disclosed species in the specification, the following patently distinct species identified as:

- (1) A leasing program that requires the lowest monthly payment.
- (2) A leasing program for multiple customers.
- (3) A leasing program that generates the largest profit.
- (4) A leasing program that generates the largest profit for a particular monthly payment.
- (5) A leasing program that generates a specified paid reserve amount and calculating a money factor to generate the specified paid reserve amount.
- (6) A method for populating fields of a credit application.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patently distinct, applicant should submit evidence or identify such now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other invention.
